

# Jack's Bet Club

## Algorithm

My algorithm analyses past head-to-head results to determine which team is more likely to win the fixture and how likely this predicted result is to occur. If the probability of a result is high enough a bet will be calculated as either 1X or 2X where 1X indicates Team 1 to Win or Draw and 2X indicates Team 2 to Win or Draw.

## Current Success Rates:

Bronze: 81.42%

Silver: 78.57%

Gold: 80.77%

## Gold Bets:

Rennes vs Angers	1X
West Ham vs Man City	2X
