

Algorithm:

I have developed a betting Algorithm to predict the outcome of football matches as a Double Chance (2X). This means that the Algorithm predicts either Team 1 or Team 2 to Win or Draw where 1X indicates Team 1 to Win or Draw and 2X indicates Team 2 to Win or Draw.

The Algorithm also determines the likelihood of a bet coming through, and places individual bets into tiers based on this probability.

Bronze = 80%

Silver = 85%

Gold = 90%

Current Success Rates:

Bronze: 77.27%

Silver: 68.42%

Gold: 90.00%

How to Use:

1. Single Bets on any game
2. Small 3-5 game accumulators with a mix of Bronze, Silver, and Gold games.

Leagues:

Currently my Algorithm predicts matches in the following leagues:

English Premier League, German Bundesliga, Spanish La Liga, Italian Serie A, French Ligue 1.

Bet List:

Gold:

Liverpool vs Bournemouth (ENG):	1X
Barcelona vs Real Sociedad (SPA):	1X
Hertha Berlin vs Werder Bremen (GER):	2X
Borussia Monchengladbach vs Borussia Dortmund (GER):	2X
Bayern Munich vs FC Augsburg (GER):	1X
Lille vs Lyon (FRA):	1X

Silver:

Burnley vs Tottenham (ENG):	2X
Southampton vs Newcastle (ENG):	2X
Wolves vs Brighton (ENG):	2X
Getafe vs Celta Vigo (SPA):	1X
Strasbourg vs PSG (FRA):	2X
Dijon FCO vs Toulouse (FRA):	1X
Rennes vs Montpellier (FRA):	1X
Udinese vs Fiorentina (ITA):	2X

Bronze:

Sheffield United vs Norwich City (EN):	1X
Arsenal vs West Ham (EN):	1X
Leicester vs Aston Villa (EN):	1X
Angers SCO vs Nantes (FR):	2X
Marseille vs Amiens (FR):	1X
Juventus vs Inter (ITA):	1X
