Jack's Bet Club

Algorithm

My algorithm analyses past head-to-head results to determine which team is more likely to win the fixture and how likely this predicted result is to occur. If the probability of a result is high enough a bet will be calculated as either 1X or 2X where 1X indicates Team 1 to Win or Draw and 2X indicates Team 2 to Win or Draw.

Current Success Rates:

Bronze: 82.89%
Silver: 77.52%
Gold: 81.44%

Gold Bets:

Udinese vs Fiorentina	2X
