Algorithm:

I have developed a betting Algorithm to predict the outcome of football matches as a Double Chance (2X). This means that the Algorithm predicts either Team 1 or Team 2 to Win or Draw where 1X indicates Team 1 to Win or Draw and 2X indicates Team 2 to Win or Draw.

The Algorithm also determines the likelihood of a bet coming through, and places individual bets into tiers based on this probability.

Bronze = 80%   Silver = 85%   Gold = 90%

Current Success Rates:

Bronze: 76.92%
Silver: 75.00%
Gold: 92.86%

How to Use:

1. Single Bets on any game
2. Small 3-5 game accumulators with a mix of Bronze, Silver, and Gold games.

Leagues:

Currently my Algorithm predicts matches in the following leagues:

English Premier League, German Bundesliga, Spanish La Liga, Italian Serie A, French Ligue 1.

Bet List:

Gold:

Bologna vs Juventus (ITA):	2X
Man City vs Burnley (ENG):	1X

Silver:

Real Madrid vs Eibar (SPA):	1X
Verona vs Napoli (ITA):	2X
Leganes vs Valladolid (SPA):	1X
Valencia vs Levante (SPA):	1X
Hoffenheim vs Hertha Berlin (GER):	1X
SPAL vs Cagiliari (ITA):	2X
Toulouse vs Metz (FRA):	2X
Athletico Bilbao vs Atletico Madrid (SPA):	2X
Bordeaux vs Rennes (FRA):	2X
PSG vs Nice (FRA):	1X

Bronze:

Lyon vs Reims (FRA):	2X
Brighton vs Arsenal (ENG):	1X
Norwich vs Southampton (ENG):	2X
Montpellier vs Marseille (FRA):	2X
Amiens vs Angers (FRA):	2X
Real Sociedad vs Osasuna (SPA):	1X
Sevilla vs Real Betis (SPA):	1X
Eintracht Frankfurt vs B Monchengladbach (GER):	2X
